Our partnership with Phrase started in 2015, when we were offered to use their cutting-edge product free of charge to provide quality education to our students. Being cloud-based and having a user-friendly interface made their software the ideal product for our students. The fact that it was not only a CAT tool but a translation management system, thus allowing students to experience the real work in a translation agency, was another factor which made it indispensable for us.

Our students have been using it ever since in multiple translation projects, benefiting from the opportunities it provides.

We would like to thank Phrase  **Phrase** (<https://phrase.com/roles/academia/>) for their unyielding support through the years of our cooperation and for helping us provide quality education for our students and a chance to experience real life translation with cutting-edge technology.
